BROOKS

We sink a lot of sweat into studying the run — the science behind great gear, the physics of the body in motion, the perfect recipe for post-run brownies. (OK, that last one is for after we leave the office. But still important.) No matter how much we study, though, it's impossible to interview every runner in the world.

So this season, our philosophy is simple: runners have the final word on their run. You know what time you like to lace up, how you want your shoes to feel, and what climate you'll be cruising through. We made our fall line to give runners the power of choice, with gear that can be combined and customized to suit their unique needs

Our biggest news: more **fit options**. Choose between our classic running shoe feel, with flexibility and structure and our **StealthFit option**. Designed to wrap the foot and adapt to the runner's movements, StealthFit offers stretch and compression like never before. For now, the choice is only available for the **Levitate 5**, but we'll be expanding this offering to more shoes in future seasons. Stay tuned.

While those additions to our line are in progress, we've already added something to two of our most popular shoes. The **Ghost 14** and the **Adrenaline GTS 22** now have **100% DNA LOFT cushioning** for a softer, smoother feel. Runners who want a balanced ride with just-right softness have always loved the buttery smoothness of these shoes — so we're listening to their needs and giving them more of the comfort they crave.

But we know comfort goes beyond the feet. Comfort is also about confidence on the run. And for those who cover distance in the dark, high-visibility gear is key. That's why we made **updates to our Run Visible Collection** this season. Building on the research that sparked this line, we've made changes that make you even more recognisable as a human in our gear. We've also added a variety of pieces, so runners in different climates have more options.

While we're old pros at making awesome running gear, the only one who knows what works for you is, well, you. However — and whenever — you run, your gear should always be a perfect fit.

FACT: NO TWO RUNNERS are ALIKE

Run Signature helps you pick the right shoes. We start by determining the deviation between the way your body moves while on the run versus off — this result determines the amount of support you may need. Then you choose your preferred experiences: cushioning to keep things soft, spring-like energy to propel you forward, featherlight speed, or lightweight flexibility. We use what we learn to match you with your perfect running shoes.

A SHOE FOR EVERY RUN. A SHOE FOR ALL WHO RUN.

SHOES YOUR OWN ADVENTURE

You can go your own way — and get gear to match. Runners know how they like to log miles. With some updates to our footwear, we're making it easier than ever for them to find the shoes they want.

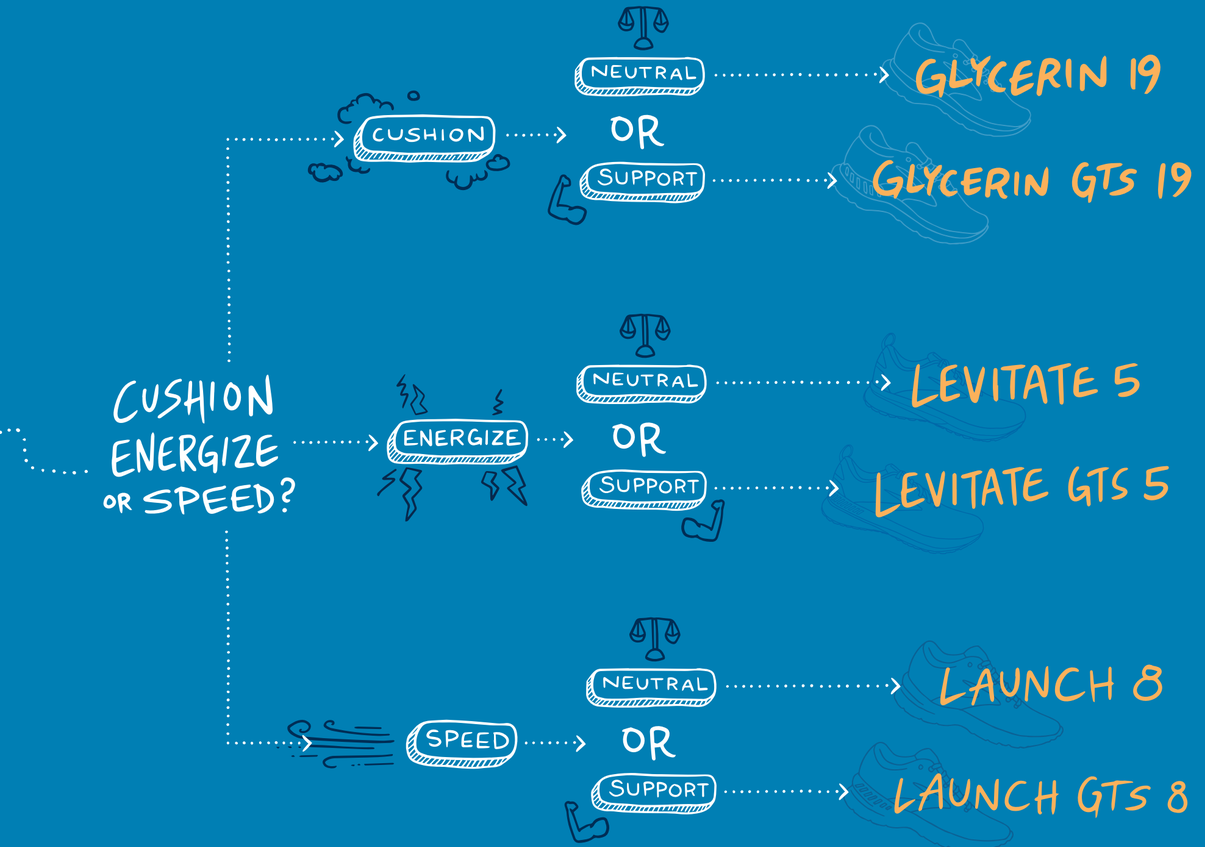
This fall, the springy Levitate line has a support and a neutral option, just like the Launch and Glycerin lines. Runners can focus on the experience they want — from super spring to cloudlike cushion — then select their support preference from within the same style. And retailers benefit from the existing equity in our most popular shoes, plus more marketing investment to support fewer different styles.

HERE'S HOW IT WORKS:

"GTS" now indicates "Go-To Support." So rather than the Levitate and the Bedlam, we have the **Levitate** and **Levitate GTS**. Our most energizing shoe joins the Launch and the Glycerin, which switched over to this naming convention in Spring 2021.

GTS shoes feature our patented GuideRails® support technology.

So while you see fewer shoe names in our lineup, there are just as many options for every type of runner. Now it's easier than ever to pair people with the perfect shoe.



ON THE UP & UPPER

The super springy Levitate 5 gives runners the energy to go after their goals. It's a leader in energy return — and it's also leading a new initiative at Brooks, so runners can get the Energize experience they crave, tailored to their needs.

The most exciting update:

THERE ARE 2 FIT OPTIONS TO CHOOSE FROM.

Get the Levitate 5 with the familiar running shoe fit: an upper that blends flexibility and structure to accommodate the demands of the foot. Or go for the Levitate 5 with **StealthFit**: sleek and snug with stretch and compression, it's specifically designed to wrap the foot and adapt to the runner's movements.

And customised comfort doesn't stop with the fit. Our best energy return is also available with GuideRails® support in the Levitate GTS 5 (formerly the Bedlam). Just like its neutral counterpart, the Levitate GTS 5 comes with the classic fit or the closer-to-foot StealthFit.

With four versions of our highest energy-return shoe, runners are sure to find the right spring for their stride in the Levitate, Levitate StealthFit, Levitate GTS, or Levitate StealthFit GTS.

LEVITATE 5 NEW

Max energy return puts a spring in your step.

Super springy

Our DNA AMP midsole technology delivers high energy return that helps your foot spring off the ground with each step.

New and improved fit

A new engineered circular knit material in the upper provides breathability and ensures a more flexible, accommodating fit.

Quick transitions

The arrow-point pattern in the outsole lets your foot move quickly from heel to toe, enhancing the shoe's springy feel.

What's New

- Updated last provides a fit that better accommodates the foot.
- New circular knit engineered mesh upper for a better fit.

Additional Benefits

- 3D Fit Print in the midfoot offers a secure fit.
- DNA AMP provides 71% energy return.

CUSHION

Smooth hits its stride

There's something to be said for old favourites. After all, people love them for a reason. Just look at the Ghost — the top runner pick that show no sign of slowing down. They offer a fine balance in each step. Soft but not too soft. Structured yet flexible. And it all comes together for a smooth, easy ride.

This season, we **updated the midsole so it's made of 100% soft DNA LOFT cushioning**. Now every step in the neutral Ghost is even more silky smooth than before.

We made the change so runners who like a balanced ride get even more of it. The Ghost offer just-right cushioning to make striding feel like gliding. You only have to try them on to see why they've had such a long run at the top.

SUPPORT

BEAST ’20

ARIEL ’20

Support and cushion working together in the name of maximum comfort.

Trusted stability

We’ve shifted our focus beyond the feet to the most injury-prone part of a runner’s body: the knees. GuideRails® support keeps you moving comfortably by keeping excess movement in check.

Soft cushioning

Thanks to our patented BioMoGo DNA midsole, ultra-softness and durability aren’t mutually exclusive. The Ultimate Sockliner enhances comfort.

Enhanced fit

Enjoy comfort front to back with a spacious yet secure fit thanks to an engineered-mesh upper and conformable embroidered saddle.

Additional Benefits

- A full-length Segmented Crash Pad accommodates any foot landing and delivers smooth heel-to-toe transitions.
- GuideRails® support technology significantly reduces weight compared to prior versions.
- The Ultimate Sockliner adds cushioning for a plush in-shoe feel.
- The embroidered saddle and eyestay offer a modern look.

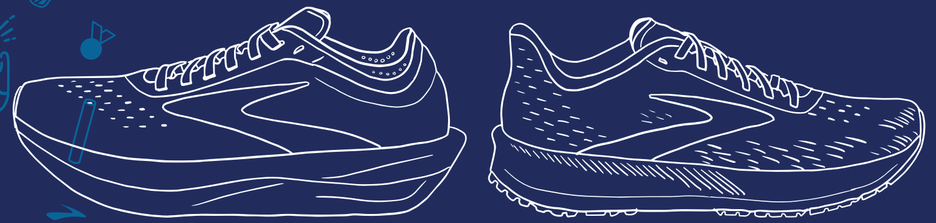
SPEED
SPEED
SPEED
SPEED
SPEED
SPEED

HI, SPEED

Whether they're ramping up to the big day, looking for a competition shoe, or just stoked about speed workouts, runners can find what they need in our Speed category.

In 2020, we rolled out new road racing shoes. The **Hyperion Elite** helped runners save energy and race faster for longer. On its heels, we launched the **Hyperion Elite 2**, made with fast, nitrogen-infused DNA FLASH cushioning that's low on weight and high on energy return.

Alongside our premium racing shoes, we created the **Hyperion Tempo** for faster, longer training. Featuring DNA FLASH and a performance fit, the Hyperion Tempo is ideal for hard workouts leading up to race day.



This season, we're updating our Speed category once again. Meet our brand new cross-country spike: the **Draft XC**, designed for high school runners. While the rest of our spikes were developed in partnership with professional athletes, our newest shoe came to life based on insights from young athletes.

Across the board, we learned that high school runners love the community that the run provides. They are driven support and represent their teams. So the **Draft XC** and **Draft XC Spikeless** provide a blank canvas — a customisable heel piece where the runner can record PRs, draw their school mascot, or write in a team cheer.

Because these runners take on a variety of terrain, the shoes are also uniquely designed for traction on different surfaces. The Draft XC has six strategically placed spikes that dig in for better footing on soft, muddy, or slushy ground, while the Draft XC Spikeless is designed with durable lugs to deliver excellent traction. Both models have a wide midfoot for stable footing.

The latest additions to our lightning-fast lineup allow us to provide even more choices to race-ready runners.

Men's

Women's

SPEED
NEUTRAL

HYPERION TEMPO

Light and responsive for better training on your way to race day.

Ultralight, responsive cushioning

Our new DNA FLASH midsole compound is nitrogen-infused to offer ultralight cushioning plus adaptive energy return.

Energy savings

The Hyperion Tempo keeps you running in your preferred motion path, allowing you to save energy and train faster.

Performance fit

The breathable stretch-woven upper moves with your foot to provide maximum comfort.

Additional Benefit

- DNA FLASH is made with a new nitrogen infusion process optimised for light weight, energy return, and speed.

LESS SCREEN TIME. MORE GREEN TIME.

No matter how rocky the trail gets, we have the gear to keep you rolling. Our Trail collection has options for any style of all-terrain running.

TRAIL
TRAIL
TRAIL
TRAIL

CASCADIA 16

This season's rock star is the Cascadia 16, revamped to be more protective and adaptive than before. We've added new release grooves at the forefoot and heel, plus vertical grooves in the Ballistic Rock Shield that allow for flex at localised points. These help the shoe absorb and deflect impact while adapting quickly to changing terrain. And to make the ride even more comfortable, we updated the midsole with our soft, lightweight DNA LOFT v2 cushioning and more foam overall. Think of the Cascadia as your adaptable adventure buddy — helping you feel at home on any trail.

DIVIDE 2

If the sidewalk is your usual stomping ground, the Divide 2 is your ticket to the trails. With a secure but familiar fit, this shoe helps turn road runners into trail blazers.

CALDERA 5

The Caldera 5 is right for runners who want more cushion on rugged terrain. Supremely soft with a secure fit, the shoe's float-like ride lasts through even the longest trail runs.

CATAMOUNT

And if you're more interested in conquering the trail than just completing it, check out the Catamount. With super light and responsive cushioning plus a high-traction outsole, this shoe is built to go fast and far.

However you choose trail, you'll find what you need here. Because as much as we love a little urban exploration, leaving the pavement has its perks: fresh challenges, a change of scenery — and a reason to explore a whole new style of running.

CHOOSE YOUR EXPERIENCE for TRAIL RUNNING.

CUSHION — Rugged and versatile to protect you on any trail.

SPEED
NEUTRAL

CATAMOUNT

Light and responsive to help you run faster and farther on the trails.

Ultralight, responsive cushioning

Our new DNA FLASH midsole compound is nitrogen infused to offer ultralight cushioning plus adaptive energy return.

TrailTack sticky traction

Feel confident on any terrain, thanks to the extra traction of our TrailTack sticky rubber outsole.

Flexible protection

Our updated Ballistic Rock Shield protects your foot from roots and rocks without feeling stiff underfoot.

Additional Benefits

- TPU Mud Guard provides protection from trail debris.
- Drainage slits release water so feet can dry more quickly.
- Suede internal reinforcement keeps your foot locked down while keeping debris out.

CASCADIA 16 NEW

Adaptable. Protective. Ready for technical terrain.

Enhanced adaptability

New midsole and outsole construction lets the shoe mold easily to the ground, improving the stable ride.

Flexible protection

Updated Ballistic Rock Shield protects against pebbles and debris while also adapting more easily to uneven terrain.

Softer cushioning

Our new DNA LOFT v2 midsole is softer and lighter than before.

What's New

- Cushioning is softer and lighter, thanks to DNA LOFT v2 technology.
- We added 2mm of foam to the midsole for added comfort.
- More release grooves in the midsole allow for enhanced adaptability on rough terrain.
- Ballistic Rock Shield now includes vertical grooves to provide side-to-side adaptability.

Additional Benefits

- TrailTack rubber outsole provides wet-dry traction.
- Gaiter tab on heel secures gaiter.
- Lace keeper stores laces out of the way.
- Drainage ports allow water to escape quickly.
- Gusset keeps out sand and small debris.

ENERGIZE
NEUTRAL

CALDERA 5

Supreme comfort with adaptive cushioning built for the trail.

Adaptable grip

Thick BioMoGo DNA cushioning in the midsole works with the outsole's large grooves to adapt to changing trail terrain.

360° comfort

The monoloop engineered mesh upper provides a secure and breathable fit.

Rugged traction

The TrailTack sticky rubber outsole and high surface-area lugs provide outstanding uphill and downhill traction — even on wet surfaces.

What's New

- New midfoot ghillies provide a flexible yet locked-in feel.

Additional Benefits

- BioMoGo DNA midsole cushioning dynamically adapts to your stride.
- A lightweight, durable mesh upper provides ventilation and drainage.
- A mud guard and TPU toe cap enhance protection and durability in high-abrasion zones.
- The engineered mesh applies strategic stretch and structure for an impeccable fit.
- Front and back attachment points make it easy to secure gaiters.
- The lace keeper stows laces out of the way.

TRAIL

LIVE LIFE FEET FIRST

Let's be real. We ask a lot of our bodies, and especially our feet. They carry us everywhere, supporting us day in and day out.

We recognise how important it is to be comfortable on our feet, so we make shoes that provide solutions to the many issues our feet may face. This collection of shoes provides an array of options, from specialised widths to extra stability to a little extra room for orthotics — these shoes are the ones we lean on when our feet need a little TLC.

And if they happen to be showing up on runways and in photo shoots, well, let's just say we were ahead of our time.

Men's

Women's

CUSHION
SUPPORT

ADDICTION WALKER 2

Slip resistant. Supportive. Soon to be your favourite.

Maximum support

Our Extended Progressive Diagonal Rollbar (PDRB) is a support system for your entire body. It strategically positions arch support to guide and keep your body in its natural path of motion.

All-day comfort

BioMoGo DNA, our proprietary cushioning, adapts to your stride, weight and speed. Why? So it can help protect you by reducing impact on your joints.

Slip resistant

What stands between you and a lack of traction? An innovative outsole that's been certified (SATRA TM144:2011) for slip resistance.

Additional Benefits

- The full-grain leather upper is both comfortable and durable.

TECH TALK Specialised, high-tech features that set our shoes apart.

midsole

DYNAMIC CUSHIONING

BioMoGo DNA
An adaptive midsole material that blends BioMoGo and Brooks DNA to create dynamic cushioning that accounts for a runner's unique stride, weight, and speed.

DNA AMP
Our most responsive midsole technology that offers best-in-class energy return by encasing a polyurethane-based foam inside a thermoplastic polyurethane (TPU) skin.

DNA FLASH
A nitrogen-infused midsole cushioning compound that provides ultralight softness with plenty of energy return to power your run.

DNA LOFT
A finely calibrated mix of Brooks DNA foam, air, and rubber, DNA LOFT cushioning is our softest, engineered to provide softness underfoot without losing responsiveness or durability.

DNA LOFT v. 2
Lighter than the original but just as soft, DNA LOFT V2 has a unique balance of rubber, air, and a less dense, lighter foam for a plush feel that won't bottom out or weigh you down.

FLEXIBILITY & ALIGNMENT

Omega Flex Grooves
An Omega-shaped innovation that enhances the flexibility of the midsole for an effortless forefoot ride without compromising the integrity of the midsole cushioning.

Propulsion Plate
A carbon fibre propulsion plate that is engineered to push runners forward with every stride. It works with ultralight cushioning for optimal efficiency on race day.

Rounded Heel
A slight curve of the heel that shifts the point of force forward, aligning through the center of the ankle joint to reduce internal stress on the body.

Release Grooves
Strategically placed Release Grooves in the forefoot and heel work with the full shoe, helping adapt to any terrain.

Segmented Crash Pad
Shaped like a caterpillar, a system of fully-integrated shock absorbers that accommodate any foot landing to maximise efficiency, provide cushion, and create smooth heel-to-toe transitions.

SUPPORT

Extended Progressive Diagonal Rollbar
An extended version of our Progressive Diagonal Rollbar, which is a tri-density post at the medial arch that is biomechanically engineered to allow for progressive support and create smoother transitions from the midstance phase to the propulsion phase.

GuideRails®
An innovative, holistic, on-demand support technology that guides the body — hips, knees, and joints — into its natural motion path of least resistance.

outsole

Ballistic Rock Shield
A toughened, thermoplastic EVA sheath between the outsole and midsole that protects the forefoot by spreading out point loads from sharp objects.

Dual Stability Arch Pods
A passive support system utilised in the Dyad to enhance inherent stability without the use of a post.

Green Rubber
Our rubber compound that's thinner than traditional outsoles while still delivering traction and durability. Green rubber is also made primarily out of silica instead of petroleum, making it a more sustainable choice.

IDEAL Pressure Zones
An outsole technology that evenly disperses impact away from the body for a comfortable and effortless ride.

Omni Grooves
Flex grooves that allow for multidirectional flexibility.

Slip-Resistant Outsole (SATRA TM144:2011)
Slip resistance on both wet and dry surfaces.

TrailTack Rubber
A sticky rubber compound that provides outstanding uphill and downhill traction, even on wet surfaces.

upper

3D Fit Print
An advanced screen-printing process to apply strategic stretch and structure for a seamless, impeccable fit.

Engineered Mesh
Custom-designed and strategically woven or knit mesh that provides optimal structure and breathability.

Fit Knit
Our premium knit construction specifically designed to move and expand seamlessly with your foot for a sock-like fit and optimal performance.

GORE-TEX® Invisible Fit
An updated lightweight membrane is bonded directly to the upper for a lighter, more flexible fit, offering breathable, waterproof protection on the run.

OrthoLite® Sockliner
Contoured insert designed to fill any negative space under the foot.

Stretch Woven
A pliable upper construction that wraps the foot in a sock-like fit.

Ultimate Sockliner
A PU insert with an OrthoLite® memory foam middle layer and convoluted egg-crate surface that provides substantial cushioning, breathability, and conformability.

Have you heard about FastTrack Mobile?

It's easy to use FastTrack on the web — it's even easier on the app.

With FastTrack you can:

- Plan and manage futures and at-once orders
- Check inventory
- Drop ship directly to runners in store or offsite when used in combination with a POS tool
- Access product information

Four Steps to Ordering Success:

1. If you haven't downloaded the mobile app, go to Google Play or the Apple App Store and search for "Brooks FastTrack."
2. Log in to the app using your user ID and password.
3. Launch the camera by tapping the icon at the bottom of the screen (iOS) or swiping right to reveal the camera icon (Android).
4. Scan the product barcode.

If you don't have a FastTrack account, contact FastTrackHelp@brooksrunning.com to get set up.

FastTrack BROOKS

LOCALLY

Did you know runners are 4x more likely to do their research on brooksrunning.com and buy in a physical store than they are to finish their purchase online?

Locally allows Brooks to tell online shoppers when you have our products available in store. We have found that retailers who share their inventory with Locally.com benefit from the web traffic on brooksrunning.com.

Signing up for Locally can:

Introduce runners to your store
Locally.com provides additional exposure to runners new to town or who haven't been into your store yet. Enjoy a customizable notification schedule that lets you receive text and/or email alerts during business hours and also have the option to direct message with the shopper at any time during the ordering process. Retailers that share inventory with Brooks through Locally get five times more views than those that don't on our dealer locator.

Drive traffic and sales
Reserve Online / Pickup In Store, Buy Online / Pickup In Store, and Same Day Delivery are now available through Locally. Sales from these transactions on Locally have increase 4-6X throughout 2020 as customer shopping behavior has evolved. This expanded toolkit gives runners more opportunities than ever to shop your store. You can also accept orders for in-store pick up directly from brooksrunning.com, Facebook, your own site and Locally.com.

Help us highlight your store
When our website inventory runs low, we direct runners to Locally to search retail inventory in their hometowns — at stores like yours! And, Brooks can layer Locally's store locator tool into marketing campaigns to drive attendance to store events.

Have any questions or just want to get started? Contact your Brooks rep, or head straight to www.locally.com/go/launch.
